An experienced software developer and natural problem solver with a diverse skill set. Thrives in challenging situations. Experienced in applying analytical thinking and innovative strategies to quickly identify root causes of problems. Implements practical solutions resulting in measurable outcomes that positively affect product quality. Excellent communication skills and thought leadership. A team leader able to empower and energize others. Embraces Diversity, Equity, and Inclusion.

Professional Experience

Software Technical Lead - Gaea Global Technologies

July 2022- Present

Santa Clara, California

- Software development consultant for Meta Platforms Inc.
- Develops a suite of back-end integrations between various disparate internal proprietary systems, Oracle Primavera P6, Oracle Unifier and other ubiquitous tools like Sharepoint and Google drive to increase project data visibility to project owners and director level decision makers.
- Establishes training initiatives to onboard and effectively triple developer headcount.
- Delivers intricate and information-rich training materials and product documentation within tight deadlines to train up new hires in a fraction of the time others were afforded.
- Oversees code quality and facilitates robust code review processes enabling developers to efficiently push and deploy their codebases.
- Produces high quality training sessions, and supports teams in adopting both industry-standard technologies as well as client's proprietary tooling, with ongoing support for lasting code quality and efficient delivery of products.
- Manages and streamlines team tasks, including timely progress updates to stakeholders, and maintains a forward-looking feature release timeline spanning multiple months.

Software Developer - Gaea Global Technologies

October 2019 - July 2022

Santa Clara, California

- Software development consultant for Meta Platforms Inc.
- Language-agnostic development with integrations written in Python 3, Java 9, C++ and PHP. Other codebases interacted with also include Golang, JS and TS.
- Adhered to Test-Driven Development (TDD) principles to construct and deploy cron-scheduled integrations, ensuring long-term support for Meta's P6 and Unifier initiatives while complying with their stringent standards of code quality and security.
- Utilized the MEAN stack for agile development of internal products, fostered efficient and collaborative development processes and onboarded new customers as early adopters for new products.
- Designed and implemented proof-of-concept (PoC) solutions for showcasing to potential clients, including Blockchain-based shipment tracking on Hyperledger Fabric (Oracle) and digital twin modeling/browser viewing capabilities.
- Employed Agile methodology adhering to two-week sprints to consistently deliver high-quality deliverables.

Junior Web Application Developer - Doitall LLC/StateVitalRecords

January 2019 - October 2019

Palm Beach Gardens, Florida

- Enhanced legacy code while prioritizing test driven development, OOP and MVC best-practices.
- Leveraged knowledge of the Laravel Framework (5.3) with an amalgamation of payment, shipping, validation, ticketing, and other external API's to build a performant and robust website application.
- Scripted iMacros to automate repetitive tasks predictably and efficiently for official company services in production for customers.

Education

Palm Beach Atlantic University - B.S., Computer Science

August 2016 - May 2019

West Palm Beach, Florida
